

### **Physics in the News**

Find a current event item **from the past week** that has something to do with physics.  
It can be a physics discovery, or it can be the highest sky dive, or the rescue of a kitten in a tree.  
It should be **unique** from the rest of the class, ideally.

**Print** the story, with the date.

**Write** a comment on how physics is involved in this story **and** why this news item interested you.

Hand in a "Physics in the News" story&comment on each Friday that we meet throughout the semester.
